Technical application notes

Substrate preparation: The substrate must be clean, dry and free of grease. Fill holes or cracks beforehand with a suitable polyester filler and sand after drying.

Coating structure: Apply thinly in several coats depending on the depth of the damage. Allow to dry for at least 1 hour.

Drying: The treated surface is waterproof after 3 - 4 days at room temperature. The repaired area is heat-resistant up to 60°C.

Processing conditions: Shake the touch-up pen vigorously before use (approx. 1 - 2 min.). Hold the pen vertically when opening. Close tightly after use.

Special notes

Due to the large number of different shades of white from various manufacturers, a preliminary color test on a suitable area is recommended before application.
